

With more light output than a powerful flashlight the 24w HID Powerlight is better described as a personal searchlight. The 24w HID Powerlight delivers 1300 lumens of 6000K bright white light, the 14w delivers 860 lumens. HID lamps are extremely efficient and produce more than 10 times the lumen output of incandescent lights, they are more rugged since there is no filament to break. Rated lamp life, 2000+ hours. The rechargeable lithium ion battery is good for over 500+ recharges and has a runtime of 110 min. (60+min. PL24/6-S), based on full charge constant on, standard temperature. It is lightweight, water resistant and is perfect as a mobile work light anywhere onboard the yacht or for tenders. The protective rubber lens and end caps help with shock absorption. The Powerlight comes with 90/264V AC charger that can be used anywhere in the world and for maximum versatility a 12/24V DC charger is also available.

Powerlight warranty is one year on the lamp, ballast, battery and on/off switch and chargers with a lifetime warranty on the light body.
